

PRESS RELEASE

JMG Solutions' Super Importer & Exporter now available for Raiser's Edge NXT and Raiser's Edge hosted clients

Firm expands the Blackbaud client base it can serve with this new integration

Mississauga, Ontario, Canada (February 26, 2014) — JMG Solutions is proud to announce that its' Super Importer and Exporter product is now available to both Raiser's Edge 7 hosted clients and Raiser's Edge NXT Clients worldwide.

"The Blackbaud Global Partner Team made great strides in 2015 for Blackbaud Technology Partners," said Jeff Gignac of JMG Solutions. "By making the integration specifications available and paving the way for Technology Partners to submit their plugins for approval and certification in the hosting environment, they made this possible. We knew the minute this information was made available that it was going to be a top priority for us."

JMG Solutions worked directly with the Blackbaud Global Partner Team to help develop the necessary steps to this process. "We were the first partner to submit their plugin, so working with all of the Blackbaud people involved was crucial to getting this completed and paving the way for other partners to do the same," said Jeff Gignac of JMG Solutions.

The JMG Solutions Super Importer and Exporter (SIE) plugin allows organizations to take files from any source, CSV, Excel or any API/web service and import the data into Raiser's Edge and Raiser's Edge NXT. JMG Solutions has clients all over the world taking data from every possible source and importing it with a single click. There is no need to download a file from anywhere as SIE can use existing API's and web services to access the data. Super Importer and Exporter can also create new data elements not in the file or transform the data without manual manipulation in Excel.

"As a long time JMG Solutions client, we were very excited to hear SIE was available in the hosted environment. I had used JMG Solutions plugin at a previous organization who was self-hosted so I knew the time it would save. I am very glad to be one of the first JMG Solutions clients to use the plugin with the hosted environment" says Marion Putman, Manager of Annual Programs & Raiser's Edge at The Scarborough Hospital Foundation in Toronto.

JMG Solutions is a long time member of the Blackbaud Technology Partner Network. To learn more about Blackbaud's Technology Partner program, visit:

About JMG Solutions

JMG Solutions was founded in 1998 by Jeff Gignac, CFRE, bCRE Pro and is one of the oldest Independent Blackbaud consulting and customization partners. JMG Solutions has worked with almost 1000 clients serving all fundraising activities from direct mail to major gifts. As fundraisers, prospect researchers, teaching faculty at Colleges and data specialists, the JMG Solutions' staff share tips and best practices through tailored training, consulting, implementation and conversion services to Blackbaud clients in all product lines. Since 1999, JMG Solutions has been creating plugins using the Raisers' Edge 7 and since 2015, JMG Solutions has been working with Blackbaud and the NXT Teams. In 2016, JMG Solutions will be launching the first pure web based Raiser's Edge NXT integration. For more information, visit www.jmgsolutions.com
